Throw some emojis in if you feel like it!
Agenda: 10 March 2021

1. Our Roadmap - How does it work (Mary)
2. New Releases /progress this year so far (Sarala)
3. Present Planned or under consideration features for voting (Kristian)
The DataCite Roadmap

https://datacite.org/roadmap.html

DataCite Public Roadmap 2021

**New**

- **Batch update for DOIs**
  - **Suggestion:** Enable the ability to update DOIs in a batch via Fabrica.
  - Examples might be:
    - bulk assign DOIs to a list of uploaded metadata

- **Metadata completeness dashboard**
  - Dashboard showing metadata completeness for our members. Dashboards for:
    - adoption of optional metadata (e.g., description, rights information)
    - adoption of linking to external resources (e.g.,)

- **New DataCite Website**
  - Improve our online presence:
    - develop a single look and feel in all our front end services
    - consolidate underlying technical platforms used in our front end services
1. Submit an idea

Submit new idea

What would you like to be able to do? How would that help you?

How important is this to you?

NICE-TO-HAVE  IMPORTANT  CRITICAL

Submit

By submitting you agree to the Terms of Use and Privacy Policy.
2. Validate an idea

Batch update for DOIs

Suggestion: Enable the ability to update DOIs in a batch via Fabrica.
Examples might be:
- bulk assign DOIs to a list of uploaded metadata
- change the URL domain for all DOIs
- transfer DOIs based on search results

Questions
- What is the problem that this new functionality would solve?
- How do you or your organization currently do this?
- Fill our SURVEY if you want to provide further information.

How important is this to you?

Why do you need this? (Any context you provide will help us make this product better for you.)
Fill in the survey

The survey feedback will help to validate the proposed idea and used to prioritise development work.
